DUST
EXTRACTION

Precision and power for a clean cut.

Rotating extractor connector

The extractor hose never gets tangled, does not get in the way and is, therefore, always where it should be.

Slim housing

Slim body blade case allows users to perform cuts in narrow spaces faster and safer than well known working method.

RATED POWER

1300 W

CUTTING DEPTH

UP TO 55 mm

Double bearing

The double bearing of the motor improves the running smoothness and extends the service life.

Angular adjustment

For quick and easy bevel cutting. It gives a precise and angle-accurate sawing for all required cuts.

Electronically controlled

Through the selector you can adapt the speed depending on the material. The speed remains constant even during plunge-cutting.

Zero-play guidance

The guidance jaws on the guide rail can be set using just two fingers. This allows for zero-play guidance of the machine, which in turn increases the cutting quality.

Cutting depth adjustment

Referring to material thickness, the best cutting edge quality is achieved when the projected part of saw blade does not exceed tooth height.

A multiple range of possibilities always with a professional quality cutting.

With one cut through thick and thin

The cutting depth of 55 mm and the power of 1300 Watts are ideal for jobs involving larger workpieces. They also enable you to saw thick workpieces with one cut. No more time-consuming work from two sides. This minimises reworking and saves you having to go to the trouble of turning the workpiece.

A principle of flexibility

Where machines reach their limits is where it really comes into its own. The unbeatable plunge-cutting principle and the appropriate saw blade also enable you to easily master trimming work in virtually all materials up to 55 mm thick (eg sandwich boards or cable ducts).

MAIN FEATURES:

- **Clean** precise cuts thanks to guide rail usage.
- **Comfortable** cleaner conditions thanks to dust extractor.
- **Soft start** as the load and torque of the motor are temporarily reduced during start-up.
- **Longer lifetime** thanks to the overload protection.

Rated power	1300 W
No-load speed	2000-5000 min ⁻¹
Max.Ø of circular saw blade	165 mm
Min./ Max. bore Ø of circular saw blade	20 mm
Max.thickness of circular saw blade	2,4 mm
Max.cutting depth by 90°	55 mm
Max.cutting depth by 45°	38 mm
Weight	4,7 kg

Delivery set:

- x1 Plunge circular saw
- x1 Owner's manual
- x1 Circular saw blade
- x1 Allen key
